

FOOD PRESERVATION DEPARTMENT 18

1. Read General Rules and Static Exhibit Rules carefully.
2. Products must have been made from foods prepared by the exhibitor.
3. All exhibits must be in standard canning jars (no baby food or mayonnaise jars), preferably quart, pint or half-pint sizes. Be sure jars are uniform in appearance and sparkling clean (not sticky). Make specific note of the number of jars required in each lot. Please do not decorate jars with fabric, yarn, ribbon, etc.
4. Place uniform labels evenly and carefully on the front of each jar. If food is "mixed," such as relish, etc., state major ingredients. Label should include the following information: processing method; date; if product is home-grown; if product is prepared without salt, color keeper, commercial pectin, etc.
5. Tape telephone number to the bottom of each jar.
6. All products should be of the best quality, uniform in size and of good color. The liquid should be clear, free of sediment and filled to the proper level in each jar. Jelly should be firm enough to hold shape. Jam should be firm enough to round up on a spoon.
7. Jars must be sealed and processed according to USDA standards. For example, all acid foods including jams, jellies and marmalades must be processed in a boiling water bath. Low-acid foods, including low-acid tomatoes and all vegetables (Lots 9-14) must be processed in a pressure canner. For additional information, please refer to a current canning book published by one of the major suppliers of commercial canning jars. All jars will be tested for seal when checked into the department. Unsealed jars will not be accepted. For exhibition purposes, the screwbands must be removed. As a precautionary measure, leave the screwbands on while transporting the product, and remove while setting up.
8. As long as your articles for exhibit differ you may make more than one entry in any lot designated with an asterisk (*) after the description. In the case of 3 or more exhibits of the same kind in a particular lot, a new lot will be formed.

NOTE: Exhibits are judged for safety, product quality, labeling and eye appeal.
